

MATCH ANALYSIS — H2H · CLAY STATS · ROLAND GARROS RECORD · TOTAL GAMES

Mensik vs Fonseca [QF · ATP Best of 5]Model: 78% → Fonseca | Mensik +175 / Fonseca -227

	Mensik	Fonseca	
Clay Win %	55.6%	56.9%	Career clay win rate
Ace Rate	11.3%	4.8%	Aces per service point
DF Rate	4.0%	2.8%	Double faults per service point
BP Created	50.7%	63.2%	Return aggression / break point creation
H2H: Fonseca 2-0 Clay: No prior clay H2H Both prior meetings on hard (Basel 2025, Next Gen 2024). Fonseca 2-0 but no clay precedent.		RG Record: Mensik: QF 2025 — career best. First deep RG run. Fonseca: R16 2025 — emerged late-season. Clay form strong entering 2026.	R16 Form: Mensik: 13A 9DF 5-set marathon vs Cerundolo (FATIGUED) Fonseca: 0DF clean 3-set win (FRESH)
		Total Games Model: OVER 38.0 [Proj: 41.2] A+ Both H2H meetings went full distance (Basel, Next Gen). Mensik 9 DFs = constant serve breaks. ATP best of 5 with fatigue factor. Model: 40-43 games.	

Zverev vs Jodar [QF · ATP Best of 5]Model: 88% → Zverev | Zverev -303 / Jodar +240

	Zverev	Jodar	
Clay Win %	76.1%	75.0%	Career clay win rate
Ace Rate	8.5%	4.9%	Aces per service point
DF Rate	3.0%	2.4%	Double faults per service point
BP Created	57.7%	72.4%	Return aggression / break point creation
H2H: FIRST MEETING Clay: No H2H — first ever match Zero H2H history at any level. No mental edge either way — pure clay model and current form.		RG Record: Zverev: 2020 F, 2024 SF, 2025 QF — elite RG performer. Multi-year clay specialist at this venue. Jodar: First RG QF — career best. Jodar saved 10/14 BP in R16, elite clutch under pressure.	R16 Form: Zverev: 4A 2DF 3-set clean win (FRESH) Jodar: 3A 3DF 5-set battle, 10/14 BPS (71%) — GOOD FORM but tested
		Total Games Model: OVER 36.5 [Proj: 39.1] A First meeting = no mental blueprint to shortcut match. Jodar 71% BP save rate means he won't capitulate. Both top clay players. Model: 38-41 games.	

Svitolina vs Kostyuk [QF · WTA Best of 3]Model: 56% → Kostyuk | Svitolina +100 / Kostyuk -125

	Svitolina	Kostyuk	
Clay Win %	75.0%	75.8%	Career clay win rate
Ace Rate	4.0%	2.9%	Aces per service point
DF Rate	3.4%	7.6%	Double faults per service point
BP Created	82.3%	89.0%	Return aggression / break point creation
H2H: Kostyuk leads recent 2-1 Clay: No prior clay meetings Kostyuk leads H2H 2-1 in recent meetings (Toronto 2024). Svitolina won earlier in career. MARKET moved Kostyuk to -125 FAVORITE — sharp money on Kostyuk.		RG Record: Svitolina: 2018 RG champion. Multiple QF/SF runs. Knows how to win here — big RG pedigree. Kostyuk: First RG QF — career best. Younger, improving clay player. Ukrainian derby adds pressure.	R16 Form: Svitolina: 3A 1DF 3-setter (slight fatigue from longer match) Kostyuk: Won R16 — specific stats not captured but market moved heavily to her
		Total Games Model: OVER 21.5 [Proj: 22.8] A DERBY MATCH — Ukrainian players, maximum emotional intensity. Both clay win rates nearly identical (75.0% vs 75.8%). H2H competitive. WTA best of 3 but could easily go to a 3rd set. Model: 22-24 games.	

Andreeva vs Cirstea [QF · WTA Best of 3]Model: 85% → Andreeva | Andreeva -189 / Cirstea +150

	Andreeva	Cirstea	
Clay Win %	77.8%	59.3%	Career clay win rate
Ace Rate	3.4%	4.0%	Aces per service point
DF Rate	4.3%	2.5%	Double faults per service point
BP Created	83.0%	77.2%	Return aggression / break point creation
H2H: Andreeva 1-0 Clay: Andreeva 1-0 (Linz 2026 indoor clay) Andreeva leads 1-0 on the only H2H, which was on clay. Sole precedent favors Andreeva.		RG Record: Andreeva: 2025 RG SF — breakthrough star here. RG is her best Major. Knows exactly how to win on Chatrier. Cirstea: 2023 RG QF — career best was a surprise run. Now 32, in decline phase. Inconsistent in 2026.	R16 Form: Andreeva: Dominant 2-0 win (FRESH, confident, in top form at Roland Garros) Cirstea: Won R16 but Cirstea is aging and inconsistent on clay
		Total Games Model: OVER 21.5 [Proj: 22.4] B+ Andreeva wins comfortably but Cirstea (59.3% clay) is a crafty veteran who takes games. WTA so 3 sets possible. Andreeva won't let off gas given RG SF run in 2025 — she knows this court. Model: 21-24.	

Sabalenka vs Shnaider [SF · WTA Best of 3]			Model: 91% → Sabalenka Sabalenka -500 / Shnaider +350	
	Sabalenka	Shnaider		
Clay Win %	80.4%	66.7%	Career clay win rate	
Ace Rate	4.7%	1.8%	Aces per service point	
DF Rate	3.9%	4.1%	Double faults per service point	
BP Created	84.8%	76.3%	Return aggression / break point creation	
H2H: No prior meetings Clay: No H2H — first meeting Shnaider too new to top level for any H2H vs Sabalenka. First ever meeting. Shnaider just pulled off massive upset vs Keys (50 UEs from Keys).		RG Record: Sabalenka: 2025 RG champion — DEFENDING TITLE. Multiple final/SF runs. Best claycourter on WTA tour. Shnaider: First RG SF — career best. Upset Keys in QF (Keys had 50 UEs, 14% BPS). Shnaider in form but Keys collapse inflated her result.	R16 Form: Sabalenka: Won QF vs Osaka — dominant Sabalenka performance expected Shnaider: Upset Keys 15-9 (3 sets) — Keys had complete collapse, Shnaider played well but benefitted	Total Games Model: UNDER 19.5 [Proj: 18.8] B+ Sabalenka 80.4% clay vs Shnaider 66.7%. DEFENDING CHAMPION on her court. Shnaider won via Keys collapse — facing Sabalenka is a different level. Model: 6-3 6-2 = 17 games. Tight but UNDER.

FAA vs Cobolli [SF · ATP Best of 5]			Model: 55% → FAA FAA -167 / Cobolli +130	
	FAA	Cobolli		
Clay Win %	65.0%	63.0%	Career clay win rate	
Ace Rate	7.0%	5.3%	Aces per service point	
DF Rate	2.8%	3.7%	Double faults per service point	
BP Created	56.0%	56.1%	Return aggression / break point creation	
H2H: FAA 1-0 (Shanghai 2025 hard) Clay: No prior clay H2H Only 1 prior meeting on hard court (Shanghai 2025, FAA won). No clay precedent. Extremely even clay profiles.		RG Record: FAA: Multiple RG QF/SF runs. Experienced at this stage. RG 2024 reached QF. Cobolli: First RG SF — career best. Won QF in 4 sets (25-18 games). Physical, grind-it-out style.	R16 Form: FAA: 9A 2DF WON IN 2 SETS (FRESH — minimal energy spent) Cobolli: 8A 2DF 4-set win (moderate fatigue — more sets played)	Total Games Model: OVER 39.5 [Proj: 40.8] B+ Nearly IDENTICAL clay profiles (FAA 65% vs Cobolli 63%). ATP best of 5 with no H2H blueprint. FAA won in 2 sets but that was vs Tabilo — Cobolli is tougher. Cobolli's QF went 4 sets. Model: 40-43 games.

Arnaldi vs Berrettini [SF · ATP Best of 5]			Model: 62% → Berrettini Arnaldi +110 / Berrettini -140	
	Arnaldi	Berrettini		
Clay Win %	54.3%	67.5%	Career clay win rate	
Ace Rate	6.0%	8.2%	Aces per service point	
DF Rate	4.1%	2.2%	Double faults per service point	
BP Created	56.2%	46.4%	Return aggression / break point creation	
H2H: Berrettini 2-1 (mostly hard) Clay: Split 1-1 on clay Berrettini leads overall 2-1. Clay H2H 1-1. Arnaldi won their most recent clay meeting (Rome 2025). Both Italian players — familiar opponents with no mental edge.		RG Record: Arnaldi: First RG SF — this is Arnaldi's career best. Clay specialist, 54.3% career clay rate. Beat Tiafoe in QF. Berrettini: 2019 RG SF, 2021 RG QF — deep pedigree here. 67.5% clay win rate — 13pts better than Arnaldi. Clay is his best surface.	R16 Form: Arnaldi: Won QF vs Tiafoe (assumed based on SF lines posted) Berrettini: ODF 92% 1stIn 3-set dominant QF win vs Cerundolo — PEAK FORM	Total Games Model: OVER 39.5 [Proj: 40.2] B+ Clay H2H 1-1 makes this a genuine 50/50 on surface. Both Italian, mutual familiarity. Berrettini RG pedigree (2019 SF) significant. Arnaldi first RG SF = pressure. ATP 5-set with both recent 3-setters = more games ahead. Model: 39-42.

TOTAL GAMES — ALL 7 MATCHES AT A GLANCE						
Match	Format	PP Line	Model	Pick	Conf	Key Reason
Mensik vs Fonseca	ATP BO5	38.0	41.2	OVER	A+	Both H2H went full distance + Mensik 9DFs + fatigue = breaks all match
Zverev vs Jodar	ATP BO5	36.5	39.1	OVER	A	First ever meeting, Jodar 71% BPS, neither player has mental shortcut
Svitolina vs Kostyuk	WTA BO3	21.5	22.8	OVER	A	Derby = 3 sets. Identical clay stats (75% each). Emotional match.
Andreeva vs Cirstea	WTA BO3	21.5	22.4	OVER	B+	Cirstea steals games (2023 RG QF pedigree). Not a blowout.
Sabalenka vs Shnaider	WTA BO3	19.5	18.8	UNDER	B+	Defending champ vs opponent who won via Keys collapse. Quick Sab win.
FAA vs Cobolli	ATP BO5	39.5	40.8	OVER	B+	Mirror-image clay profiles. Cobolli's QF went 4 sets (43 games).
Arnaldi vs Berrettini	ATP BO5	39.5	40.2	OVER	B+	Clay H2H 1-1. Berrettini 2019 RG SF pedigree. Both fresh.

ACTIVE QF — PRIZEPICKS PICKS (18 props, H2H + Clay + RG factored)

#	Player	Prop	PP Line	Type	Proj	Pick	Conf	Analysis
1	Mensik	Double Faults	5.5	goblin	8.5	OVER	A+	REAL DATA: 9 DFs confirmed in R16. Goblin=lower line means PP expects easy OVER — model agrees strongly. Career 0.040 DF rate, fatigue from 5-set battle projects 7-9 today.
2	Fonseca	Total Games	38.0	standard	41.2	OVER	A+	H2H: Both prior meetings (Basel 2025 + Next Gen 2024) went full distance. Mensik 9 DFs = constant breaks. 5-set format + fatigue factor. Model: 40-43 games on RG clay.
3	Mensik	Aces	12.5	standard	13.0	OVER	A	REAL: 13 aces in R16, 0.113 career ace rate — highest in field. Even fatigued, serves big when pressured. Fonseca clean but Mensik's serve is his weapon regardless of energy.
4	Fonseca	Fantasy Score	20.0	standard	22.0	OVER	A	REAL: 0 DFs in clean 3-set QF. H2H 2-0. Fresh legs vs exhausted Mensik. Model 22 FS = dominant win. Market underestimates Fonseca's current form peak at RG 2026.
5	Mensik	Double Faults	6.5	demon	8.5	OVER	B+	Even the demon (higher) line cleared. 9 DFs is confirmed real data — serves under pressure after 5 sets = DF rate stays elevated. 7-9 projected regardless of line level.
6	Zverev	Fantasy Score	23.5	standard	26.4	OVER	A	RG PEDIGREE: 2020 Final, 2024 SF, 2025 QF — Zverev KNOWS how to win here. Clay 76.1%. Fresh 3-set R16. First meeting with Jodar = no shortcut. Projects dominant 24-27 FS.
7	Zverev	Total Games	36.5	standard	39.1	OVER	A	FIRST MEETING: No mental blueprint either way. Jodar saved 10/14 BPs in R16 (71%) — elite clutch, won't roll over. Both clay 75-76%. Model: 38-41 games. RG clay is heavy/slow.
8	Zverev	Aces	8.5	standard	9.4	OVER	B+	0.085 ace rate = highest remaining ATP. RG 2020 Final-level pedigree = serves big in pressure moments. In a 4-setter vs unknown opponent, will lean on ace weapon. Projects 9-10.
9	Zverev	Total Games Won	20.5	standard	22.1	OVER	B+	If total is 39 and Zverev wins (88% model), he takes ~22-23 games. In RG-style 4-set win: 6-4 6-3 3-6 6-4 = 22 games. OVER 20.5 with solid cushion.
10	Jodar	Total Games Won	17.5	standard	16.8	UNDER	B	Zverev 88% model win. In 39-game match Jodar gets the leftover ~17 games. First QF in career = pressure. Zverev's RG pedigree and fresh legs should limit Jodar to 16-17 games.
11	Kostyuk	Fantasy Score	15.5	standard	17.2	OVER	A	MARKET FLIP: Sharp money moved Kostyuk to -125 FAVORITE. H2H leads 2-1 recent (Toronto 2024). 0.890 BP creation = highest WTA. Model 17+ in close derby. Market confirms the edge.
12	Kostyuk	Total Games	21.5	standard	22.8	OVER	A	DERBY MATCH: Ukrainian players, maximum intensity, both know each other's games deeply. Clay win rates nearly IDENTICAL (Svitolina 75.0% vs Kostyuk 75.8%). Goes 3 sets. Model: 22-24.
13	Kostyuk	Break Points Won	5.0	standard	5.7	OVER	B+	0.890 BP creation rate — highest WTA field. Svitolina slight fatigue from 3-setter R16. Kostyuk pressures every service game. Derby pressure elevates both players' return aggression.
14	Svitolina	Break Points Won	4.5	standard	4.1	UNDER	B	Kostyuk is now -125 fav — market says Kostyuk serves better. Svitolina slight fatigue. 0.823 BP creation but Kostyuk (75.8% clay) holds serve well. Slight UNDER on Svitolina BPW.
15	Andreeva	Fantasy Score	17.0	standard	22.0	OVER	A+	RG RECORD: 2025 SF at Roland Garros — this is her best court. REAL: Dominant 2-0 yesterday. Clay H2H 1-0 (Linz 2026). Clay 77.8% vs Cirstea 59.3%. +5pt model gap — biggest FS edge on board.
16	Andreeva	Total Games	21.5	standard	22.4	OVER	B+	Cirstea is crafty veteran who steals games even in losses (59.3% clay isn't nothing). RG 2023 she made a surprise QF run. Andreeva won't blow her out completely. Model: 21-23 tight win.
17	Cirstea	Total Games Won	11.5	goblin	7.1	UNDER	A	Goblin line still loses. Andreeva 2025 RG SF + dominant yesterday + clay H2H. Cirstea 32 years old in decline. Model: Andreeva wins 6-2 6-3 = Cirstea gets only 5 games. Well UNDER even goblin.
18	Andreeva	Break Points Won	4.5	demon	6.1	OVER	B+	Even the demon (higher) line cleared. 0.830 BP creation + Cirstea 55.8% BP saves = Andreeva earns 5-6 BPW. RG pedigree gives her extra aggression on return. Cleared even at demon price.

SF PREVIEW — PRIZEPICKS LINES ALREADY POSTED (10 props)

#	Player	Prop	PP Line	Type	Proj	Pick	Conf	Analysis
19	Sabalenka	Total Games	19.5	standard	18.8	UNDER	B+	DEFENDING CHAMPION. Clay 80.4% — highest WTA. Shnaider advanced via Keys collapse (50 UEs, 14% BPS) NOT via dominant tennis. Sabalenka 6-3 6-2 = 15 games. UNDER with good cushion.

20	Sabalenka	Total Games Won	15.5	demon	17.8	OVER	A	Demon line (high threshold) still cleared. Sabalenka wins 6-3 6-3 = 18 TGW, OVER demon 15.5. Defending RG champion on home clay. H2H zero (first meeting) = no fear factor for Shnaider to exploit.
21	Shnaider	Total Games Won	7.5	standard	5.2	UNDER	A	Sabalenka 91% model win. 6-3 6-2 = Shnaider gets only 5 games. Shnaider's QF win inflated by Keys' complete mental collapse. Against #1 defending champion it's a different level. Model: 4-6 games for Shnaider.
22	FAA	Aces	11.5	standard	13.8	OVER	A+	REAL: 9 aces in 2-SET QF win. In a 4-5 set SF vs Cobolli, projects 13-16 aces. FAA ace rate 0.070, serves even bigger in long matches. Standard line at 11.5 underestimates his SF output.
23	FAA	Double Faults	4.5	standard	2.1	UNDER	A	REAL: Only 2 DFs in QF. Career DF rate 0.028 — lowest in remaining field. Even in 5-set SF, 4.5 DFs is nearly double his career rate. Strong UNDER. FAA's serve is his most reliable weapon.
24	Cobolli	Total Games	39.5	standard	40.8	OVER	B+	Cobolli's QF went 4 sets (25-18 = 43 games). FAA won in 2 sets vs Tabilo but Cobolli is a tougher opponent. Nearly identical clay profiles means this match goes long. Model: 40-43 games.
25	FAA	Total Games Won	20.5	standard	21.8	OVER	B+	FAA slight favorite (-167). In 40-game match FAA wins ~22 games. 65% clay win rate + fresher legs (2-set QF). OVER 20.5 with modest cushion.
26	Berrettini	Aces	10.5	standard	6.8	UNDER	A	REAL: Only 2 aces in QF — Berrettini had 92% 1stIn dominance, doesn't NEED aces. Career 0.082 rate but this QF showed serve-through-placement style. 10.5 is severely overpriced. Strong UNDER.
27	Arnaldi	Double Faults	4.5	standard	5.1	OVER	B+	0.041 career DF rate. Clay H2H 1-1 (split). In a 5-set match under SF pressure at first-ever RG SF, Arnaldi's serve will be tested. H2H recent clay: Arnaldi won Rome 2025 but this is bigger stage.
28	Berrettini	Total Games	39.5	standard	40.2	OVER	B+	RG HISTORY: 2019 SF at Roland Garros = Berrettini knows how to extend matches here. Clay H2H 1-1. Arnaldi first RG SF = nerves but also adrenaline. Both 3-set QF wins = more gas in tank. ATP 5-set. Model: 39-42.

SUGGESTED SLIPS

SLIP A — TOTAL GAMES (4-LEG)		Power Play ~14x	
1. Mensik/Fonseca TG	OVER 38.0	A+	
2. Zverev/Jodar TG	OVER 36.5	A	
3. Svitolina/Kostyuk TG	OVER 21.5	A	
4. Sabalenka/Shnaider TG	UNDER 19.5	B+	

3 OVERs on close-fought matches (derby, first meetings, H2H battles) + 1 UNDER on defending champ vs opponent who won via opponent collapse.

SLIP C — SF PREVIEW (3-LEG)		~8x	
1. FAA Aces	OVER 11.5 std	A+	
2. FAA DFs	UNDER 4.5 std	A	
3. Shnaider TGW	UNDER 7.5 std	A	

FAA: 9 aces in 2-set QF projects to 13+ in longer SF. 2 DFs in QF vs 4.5 line = strong UNDER. Sabalenka defending champ projects Shnaider to 4-6 games max.

SLIP B — REAL DATA PROPS (3-LEG)		~8x	
1. Mensik DFs	OVER 5.5 goblin	A+	
2. Andreeva FS	OVER 17.0 std	A+	
3. Berrettini Aces	UNDER 10.5 std	A	

Mensik 9 DFs confirmed real data. Andreeva 2025 RG SF pedigree + dominant form. Berrettini had 2 aces in QF — 10.5 line is wildly overpriced.

SLIP D — ML + PROPS COMBO (4-LEG)		~+160	
1. Andreeva ML	WIN -189	A+	
2. Kostyuk ML	WIN -125	B+	
3. Fonseca FS	OVER 20.0	A	
4. Zverev FS	OVER 23.5	A	

Two sharp ML picks (Andreeva model +20% edge, Kostyuk market flip) plus two FS OVERs for fresh players (Fonseca 0 DFs, Zverev fresh 3-set win) at RG where they both have deep records.
